***The Art Guys Install a Large-scale Sculpture at San Antonio International  
Airport***

A large-scale sculpture created by The Art Guys is making its Texas debut inside Terminal B's second floor (departure-level) ticketing lobby. "Suitcase Wheel" is a 16' diameter wheel made of 75 vintage Samsonite suitcases stacked face to face together by an internal metal ring. This eye-catching and whimsical art piece will certainly evoke a sense of nostalgia and fascination among frequent flyers and art lovers alike. The Art Guys are a Texas-based artist duo, well known for their use of non-traditional materials and for exploring the lines between art and everyday life. "Suitcase Wheel" is on a two-year exhibition loan with the Airport.

The installation has been organized by Public Art San Antonio a Division of the Department of Culture and Creative Development and The San Antonio International Airport.
